

Company Overview

GAB Climate Smart Investments Ltd is a Ghanaian climate and sustainability company founded in 2016, advancing Sustainability, Inclusion and Climate-smart solutions across agriculture, environment, and natural resource management sectors. The company combines AI Operations Integration (integrating AI into operations for verified decisions and reduced waste, with Human-in-the-Loop governance for regulated sectors), environmental consultancy, GIS and technical services, Blue Carbon climate finance, and commercial farm operations as its delivery base. The company manages 1,078.11 acres (419 ha) across 4 parcels in Ghana, anchored by a 53-block production base at Aframso, Mampong.
